<b>EDUCATION</b>	<i>University of California, Los Angeles</i> Bachelor of Science, Computer Engineering Expected Graduation: June 2021 <b>GPA: 3.76/4.00</b> <i>Relevant Coursework:</i> Data Structures, Algorithms, Computer Architecture, Digital Design, Signals and Systems, Graphics, Linux, Linear Algebra.
<b>AWARDS AND HONORS</b>	<b>Upsilon Pi Epsilon</b> , International Computing Honors Society. June 2019 - Present <b>Tau Beta Pi</b> , National Engineering Honors Society. June 2019 - Present <b>Eta Kappa Nu</b> , International Honors Society of the IEEE. June 2019 - Present <b>Dean's Honor List.</b> Winter 2018, Spring 2019
<b>COMPUTER SKILLS</b>	<i>Languages &amp; Software:</i> <b>Proficient:</b> C++, Python. <b>Familiar:</b> C, Verilog, Adobe Creative Suite, L <sup>A</sup> T <sub>E</sub> X. <i>Operating Systems:</i> Mac OS X, Windows, Linux.
<b>PROJECTS</b>	<b>Tunnelman</b> (C++) <ul style="list-style-type: none"><li>• Created a 2-D video game on Mac where player digs through earth to find gold.</li><li>• Used inheritance and polymorphism to organize class hierarchy for characters, enemies, items, actions, and sounds. Utilized various data structures to organize game items and states.</li><li>• Implemented search algorithms for enemies to find player in a maze-like map.</li></ul> <b>Malloc</b> (C) <ul style="list-style-type: none"><li>• Implemented <i>malloc</i>, <i>realloc</i>, and <i>free</i> functions in C from scratch.</li><li>• Optimized and balanced space usage with speed. Organized virtual memory at the byte-level, using headers and footers, to efficiently allocate memory.</li></ul> <b>Stacker</b> (Verilog) <ul style="list-style-type: none"><li>• Programmed the popular arcade game, <i>Stacker</i>, for Xilinx FPGA board. Wrote Verilog modules for game mechanics, music, score, display, etc. Configured auxiliary devices such as VGA for display and piezoelectric buzzer for music.</li><li>• Project chosen by professor for use as a model project for future classes.</li></ul>
<b>WORK EXPERIENCE</b>	<i>Instructor</i> June 2019 - August 2019 Internal Drive, Inc. <ul style="list-style-type: none"><li>• Taught intensive programming classes at UC Irvine to middle and high school students.</li><li>• Classes include Python coding, encryption, robot programming, Raspberry Pi.</li></ul> <i>Learning Assistant</i> January 2019 - Present Math and Physics Departments, University of California, Los Angeles <ul style="list-style-type: none"><li>• Teach multivariable calculus and physics to students in college-level classrooms.</li><li>• Conduct various exam review sessions with over 100 attendees each.</li></ul>
<b>LEADERSHIP</b>	<i>Director of Internal Affairs</i> May 2018 - May 2019 UCLA Club Sport - Dragon Boat <ul style="list-style-type: none"><li>• Designed various apparel items for teammates, including shirts and jackets, using Adobe CS. Designed yearbook and quarterly newsletter.</li><li>• Raised over \$2000 for the team by designing and selling fundraising t-shirts.</li><li>• Organized and directed annual Alumni Day.</li></ul>
